PROFESSIONAL SUMMARY

BCA graduate and Full Stack Developer with hands-on training at HefShine Softwares, Pune. Skilled in Java, Spring Boot, Spring Data JPA, REST APIs, Spring Security, PostgreSQL, and MySQL, with experience developing database-driven applications. Seeking an entry-level Java Developer or Java Full Stack Developer role.

TECHNICAL SKILLS

Languages	: Java, Python, JavaScript, SQL, HTML, CSS
Frameworks	: Spring Boot, Spring Data JPA, Spring Security, Flask, React.js
Backend	: REST APIs, CRUD, Authentication & Authorization
Databases	: MySQL, PostgreSQL, SQLite
Tools	: Maven, Git, GitHub, Postman, VS Code, JIRA, Lombok
Concepts	: OOP, Data Structures, Collections, Exception Handling

EXPERIENCE / TRAINING

Java Full Stack Trainee — HefShine Softwares Pvt. Ltd., Pune	May 2025 – Present
- Undergoing practical Java Full Stack training including Core Java, Spring Boot, REST APIs, Hibernate, Spring Data JPA, and React. - Developing full-stack web applications with hands-on exposure to database design, CRUD operations, and RESTful service development. - Strengthening problem-solving and debugging skills through coding practice and real-world project development.	

PROJECTS

AI-Powered Job Portal Java 17 · Spring Boot · Spring Security · PostgreSQL · HTML · CSS · JS	2026
- Designed a full-stack job portal using Java 17 and Spring Boot with a layered Controller-Service-Repository architecture, integrating PostgreSQL through Spring Data JPA. - Developed RESTful APIs for user registration, authentication, job posting and management, with role-based access control for Candidate and Employer users using Spring Security. - Integrated Elasticsearch-based job search and AI-driven skill matching to analyze candidate skills against job requirements and recommend relevant job opportunities.	

MeetAI – Meeting Notes & Task Manager (Backend) Java 21 · Spring Boot · MySQL · Maven	2026 (In Progress)
- Developing a Spring Boot backend for a meeting management application; built RESTful APIs for meeting creation, task assignment, and status tracking using Spring Data JPA and MySQL. - Implemented input validation, global exception handling, and structured project setup using Maven and Lombok for clean, maintainable code. - Integrating AI functionality to auto-generate meeting summaries and actionable tasks from transcripts (in progress).
